Subject: Yucca

Part of Records Package / Supplement / Correction

Dear Ms. Carol Hanlon,

It is time to start putting Yucca Mountain to work. It has been studied to death. It has been talked to death. It is now time to get it open and start accepting nuclear fuel stored in casks around the country.

I expect that Yucca will not be needed after 400 years. I expect that our future citizens will have by then figured out how to make completely safe the waste. Given what progress we have made in the last 40 years, it seems almost 100% probable that the progress we make in the next 400 will be beyond our current imagination.

Therefore, please recommend that President Bush authorize the opening of Yucca now, and let's get going in storing the waste.

Sincerely,

Lee a. Licata
